

QA - Automation | Job Location: Remote

You are:

Highly meticulous and eager to work in a fast-paced, results-driven environment. You have substantial experience in informing designs through critical design thinking and rationalizing for B2B or B2C systems, websites, mobile, and handheld devices.

You will:

- Report to the Tech Lead
- Present your test approach to the project owner based on your detailed review of project requirements, designs, specifications, and technical documentation
- Create detailed, comprehensive, and well-structured test plans and test cases
- Report bugs, issues & defects, define corrective actions and provide recommendations for process improvement
- Report defect density, open defects by type, and track quality assurance metrics across the QA department
- Develop and execute exploratory and automated tests to ensure product quality
- Design, develop and execute automation scripts using open source tools
- Perform thorough regression testing when bugs are resolved
- Liaise with internal teams (e.g. developers and product managers) to identify system requirements
- Propose up-to-date new testing tools and test strategies

You have:

- A BS/MS degree in Computer Science, Engineering or any other related subject
- Experience in Automation Testing with Selenium & Java in UI Testing for mobile applications
- Basic Appium knowledge if you have experience in Selenium
- Preferred knowledge in TestNG, Extent report, Log4j, Bitbucket, Jira, and BrowserStack
- Strong knowledge of SQL and scripting
- Experience in writing clear, concise, and comprehensive test plans and test cases
- Hands-on experience with both white box and black box testing
- Experience in both manual and automated testing (experience in performance and/or security testing is a plus)
- Experience in working in an Agile/Scrum development process
- Familiarity with data structure languages such as XML and/or JSON and source code control management
- Experience with web-based applications, mobile and client-server technology, and test-driven development
- Excellent interpersonal communication, management, negotiation, presentation and client relations management skills
- A good understanding of budgets and business planning (understanding of UI and UX is a plus)

You can look forward to:

- Growth opportunities to excel in a forward-thinking organization
- Competitive compensation package including insurance, gratuity, and PF
- Paid leaves along with leaves for COVID recovery
- Flexibility to work from home and strike a work-life balance
- Recognition and awards for your contributions
- Training and internal learning programs
- A fun environment where everything from birthdays to work anniversaries are celebrated

When you apply:

- We will call you to set up an interview if your application matches the profile
- The first interview would be conducted after the initial screening to understand what excites you about this job and the opportunity to work with YUJ designs
- You can expect an online assignment to help us gauge your potential
- The second interview (only if your performance is satisfactory) will involve detailed discussion about your role in the organization

Meet the tribe

We are YUJ Designs. A global UX design studio with a crazy community of doers and believers. A Red Dot winner, we have been consistently delivering world-class experiences globally. We take pride in our people and culture. We have been extremely meticulous about our choices and follow stringent recruitment practices.
